Index of Feature Material

MATERIALS & METHODS

Volume 39, January-June 1954, Inclusive

Material covered in this index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts

HESIVES (SEE WELDING AND JOINING)
Adhesives Are Used In Aircraft Construction, How—Feb, p 105
ALUMINUM AND ITS ALLOYS
Aluminum Casting Alloys, Equivalent American and Foreign Specifications for (File Fact)—Apr, p 135
Aluminum Die Castings in Telephone Equipment—June, p 98
Aluminum Parts Brazed in Salt Bath, Close Tolerance—Jan, p 96
Aluminum in Pressure Vessels, Alloy Widens Future for—Apr, p 97
Sandwich Materials (MATERIALS & METHODS MANUAL)—Mar, p 117
Asbestos Textiles—What They Are, What They Can Do—Jan, p 89
Asphalt Coatings, Where Used—Feb, p 142
Austempering Thin Steel Parts—June, p 101

Beryllium, How to Braze—Mar, p 95
BRAZING (SEE WELDING AND JOINING)

Carbon Controller Makes Possible Accurate Carburizing, Carbon Restoration, Homogeneous Carburizing—Feb, p 110
Cast Copper Base Alloys, Specifications for (File Fact)—Feb, p 137
Cast Phenolic Resin (File Fact)—Feb, p 141
Cast Stainless Steels, Properties of (File Fact)—Jan, p 129
CASTINGS AND CASTING
Aluminum Casting Alloys, Equivalent American and Foreign Specifications for (File Fact)—Apr, p 135
Aluminum Die Castings in Telephone Equipment—June, p 98
Cast Copper Base Alloys, Specifications for (File Fact)—Feb, p 137
Cast Stainless Steels, Properties of (File Fact)—Jan, p 129
Pearlitic Malleable Irons Can be Used to Advantage, Where—Mar, p 100
Shell Mold Castings, One Company's Experience With—Feb, p 102
Centrifugal Compacting—A New Method for Producing Metal Powder Parts—Apr, p 86
COATINGS AND FINISHES
Asphalt Coatings, Where Used—Feb, p 142
Electropolishing of Metals and Alloys, Conditions for (File Fact)—June, p 137
Electropolishing, Where and When to Use June, p 104
Epoxy Primer Has High Resistance to Alkalies, New—Feb, p 93
Finishing Systems for Magnesium—Jan, p 102
Galvanized Steel, The New Look in—Mar, p 107
Hard-Facing, Quality—Apr, p 140
High Temperature Coatings, Two New—Apr, p 94
Polyester Film, New—Mar, p 104
Vacuum Metallizing Reduces Finishing Costs—Feb, p 108
COPPER, BRASS, AND BRONZE
Cast Copper Base Alloys, Specifications for (File Fact)—Feb, p 137
Copper Heat Exchangers, Fabricating Special Purpose—Mar, p 140

Electropolishing of Metals and Alloys, Conditions for (File Fact)—June, p 137
Electropolishing, Where and When to Use June, p 104
ENGINEERING FILE FACTS
Aluminum Casting Alloys, Equivalent American and Foreign Specifications for—Apr, p 135
Cast Copper Base Alloys, Specifications for—Feb, p 137
Cast Phenolic Resin—Feb, p 141
Cast Stainless Steels, Properties of—Jan, p 129
Electropolishing of Metals and Alloys, Conditions for—June, p 137
Hardness Conversion Tables—Mar, p 135
Nitriding Steels—Mar, p 139
Phenolic Molding Materials—Apr, p 137
Phenolic Molding Materials (continued)—May, p 225
Uranium and Thorium, Properties of—May, p 229
Epoxy Primer Has High Resistance to Alkalies, New—Feb, p 93
Expandable Polystyrene—Can Be Molded, New—Apr, p 106
EXTRUSIONS
Hot Steel Extrusions—Feb, p 96
Plastics Extrusions Grow—Jan, p 100

Finishing Systems for Magnesium—Jan, p 102
Fire Resistant Polyester, A New—Feb, p 98

Galvanized Steel, The New Look in—Mar, p 107
Government Buys: Part 1—Federal and Military Specifications, How the—Feb, p 90
Government Buys: Part 2—Qualified Products List, How the—Mar, p 110
Government Buys: Part 3—Military and Federal Standards, How the—Apr, p 110

Hard-Facing, Quality—Apr, p 140
Hardness Conversion Tables (File Fact)—Mar, p 135
Heat Resistant Alloy, New—Jan, p 82
HEAT TREATMENT AND HEATING
Austempering Thin Steel Parts—June, p 101
Carbon Controller Makes Possible Accurate Carburizing, Carbon Restoration, Homogeneous Carburizing—Feb, p 110
Machinability of Heat Treated Steels—Jan, p 86
Nitriding Steels (File Fact)—Mar, p 139
High-Strength Low-Alloy Steels (Materials & Methods Manual)—Feb, p 117
High Strength Low Alloy Steels in Transformer Equipment—Jan, p 134
High Temperature Coatings, Two New—Apr, p 94
HIGH TEMPERATURE MATERIALS
Heat Resistant Alloy, New—Jan, p 82
High Temperature Coatings, Two New—Apr, p 94
High Temperature Service, Materials for (MATERIALS & METHODS MANUAL)—Apr, p 117
IRONS
Heat Resistant Alloy, New—Jan, p 82
Metal Powder Parts, Infiltration Improves Properties of—Apr, p 88
Pearlitic Malleable Irons Can be Used to Advantage, Where—Mar, p 100

Leaded Alloy Steel, Improved Machinability in New—June, p 90

MACHINING AND MACHINABILITY
Leaded Alloy Steel, Improved Machinability in New—June, p 90
Machinability of Heat Treated Steel—Jan, p 86
MAGNESIUM
Adhesives Are Used in Aircraft Construction, How—Feb, p 105
Finishing Systems for Magnesium—Jan, p 102
Sandwich Materials (MATERIALS & METHODS Manual)—Mar, p 117
MANUALS, MATERIALS & METHODS
High-Strength Low Alloy Steels—Feb, p 117
High Temperature Service, Materials for—Apr, p 117
Materials Engineering Review and Forecast—Jan, p 111
Rigid Polyvinyl Chloride Plastics, Fabrication and Use—June, p 119
Sandwich Materials—Mar, p 117
Materials Engineering Review and Forecast (Materials & Methods Manual)—Jan, p 111
Metal Powder Parts, Infiltration Improves Properties of—Apr, p 88

Nitriding Steels (File Fact)—Mar, p 139
NONFERROUS METALS
Beryllium, How to Braze—Mar, p 95
Hardness Conversion Tables (File Fact)—Mar, p 135
High Temperature Service, Materials for (MATERIALS & METHODS Manual)—Apr, p 117
Rhenium Metal—Its Properties and Future—Mar, p 88
Tantalum, Where to Use—Jan, p 94
Thermostat Metals are Used, Where and How—Apr, p 102
Uranium and Thorium, Properties of (File Fact)—May, p 229
NONMETALLIC MATERIALS (OTHER THAN PLASTICS)
Asbestos Textiles—What They Are, What They Can Do—Jan, p 89
Sandwich Materials (MATERIALS & METHODS Manual)—Mar, p 117
Synthetic Sapphire Parts—June, p 112

Pearlitic Malleable Irons Can be Used to Advantage, Where—Mar, p 100
Phenolic Molding Materials (File Fact)—Apr, p 137 and May, p 225

(Continued on next page)

Index of Feature Material (continued)

PLASTICS
- Cast Phenolic Resin (File Fact)—Feb, p 141
- Expandable Polystyrene Can be Molded, New—Apr, p 106
- Fire Resistant Polyester, A New—Feb, p 98
- Phenolic Molding Materials (File Fact)—Apr, p 137 and May, p 225
- Plastic Bubble, Blowing A—June, p 102
- Plastics Extrusions Grow—Jan, p 100
- Polyester Film, New—Mar, p 104
- Polystyrene Parts, Crazing in—June, p 93
- Rigid Polyvinyl Chloride Plastics, Fabrication and Use (MATERIALS & METHODS Manual)—June, p 119

POWDER METALLURGY
- Centrifugal Compacting—A New Method for Producing Metal Powder Parts—Apr, p 86
- Metal Powder Parts, Infiltration Improves Properties of—Apr, p 88

Reduce Costs Through Materials Selection, How to—May, p 69

Rhenium Metal—Its Properties and Future—Mar, p 88

Rigid Polyvinyl Chloride Plastics, Fabrication and Use (Materials & Methods Manual)—June, p 119

Sandwich Materials (Materials & Methods Manual)—Mar, p 117

Shell Mold Castings, One Company's Experience With—Feb, p 102

Stainless Steels, Chromium-Manganese—Mar, p 92

STEELS
- Austempering Thin Steel Parts—June, p 101
- Carbon Controller Makes Possible Accurate Carburizing, Carbon Restoration, Homogeneous Carburizing—Feb, p 110
- Cast Stainless Steels, Properties of (File Fact)—Jan, p 129
- Galvanized Steel, The New Look in—Mar, p 107
- Hardness Conversion Tables (File Fact)—Mar, p 135
- High-Strength Low-Alloy Steels (MATERIALS & METHODS Manual)—Feb, p 117
- High-Strength Low Alloy Steels in Transformer Equipment—Jan, p 134
- High Temperature Service, Materials for (MATERIALS & METHODS Manual)—Apr, p 117
- Hot Steel Extrusions—Feb, p 96
- Leaded Alloy Steel, Improved Machinability in New—June, p 90
- Machinability of Heat Treated Steels—Jan, p 86
- Nitriding Steels (File Fact)—Mar, p 139
- Stainless Steels, Chromium-Manganese—Mar, p 92
- Steel, Killed Basic Bessemer—June, p 142
- Thermostat Metals, Where and How Used Apr, p 102

Synthetic Sapphire Parts—June, p 112

Tantalum, Where to Use—Jan, p 94

TESTING AND INSPECTION
- Hardness Conversion Tables (File Fact)—Mar, p 135

Thermostat Metals, Where and How Used—Apr, p 102

TITANIUM
- Titanium Alloy, New Weldable—Apr, p 91
- Titanium in Bolting Applications—Mar, p 98
- Titanium, Recent Progress in Joining—June, p 107

TUBING
- Copper Heat Exchangers, Fabricating Special Purpose—Mar, p 140

Uranium and Thorium, Properties of (File Fact)—May, p 229

Vacuum Metallizing Reduces Finishing Costs—Feb, p 108

WELDING AND JOINING
- Adhesives are Used in Aircraft Construction, How—Feb, p 105
- Aluminum Parts Brazed in Salt Bath, Close Tolerance—Jan, p 96
- Beryllium, How to Braze—Mar, p 95
- Hard-Facing, Quality—Apr, p 140
- Titanium Alloy, New Weldable—Apr, p 91
- Titanium in Bolding Applications—Mar, p 98
- Titanium, Recent Progress in Joining—June, p 107
